

Product Data

CARO WHITE

Calcium Aluminate Cement

Product Properties

- CARO WHITE is a 70% alumina cement developed for the construction industry.
- CARO WHITE is characterized by specific whiteness, high purity, and high reactivity which results in fast strength development.

Chemistry	Typical	Specification	
		Min	Max

All data are based upon Almatis standard test methods.

The typical properties are based upon the actual averages from production data.

CARO WHITE Calcium Aluminate Cement

Shelf life

Stored under adequate dry conditions and in the original packaging, the properties of all Almatis Calcium Aluminate Cements remain stable for a period of 24 months. Experience has shown that even after longer storage time the properties are not impaired. Exposure to ultraviolet radiation from direct sunlight can alter the plastic packaging and ultimately reduce the shelf life. An additional protection from direct sunlight is required in such cases. The shrink wrap should remain until the material is being used.

For more detailed information on Cement Testing please refer to the brochure "Cement Test Methods".

Standard Packaging

- 25 kg plastic bags
- 1 mt big bags
