

Designed To Meet The
Challenging Needs Of The
Building Chemistry Industry

CARO WHITE

PREMIUM CALCIUM ALUMINATE BINDER

▷ **High Reactivity**

▷ **High Purity**

▷ **High Whiteness**

CARO WHITE is a 70% calcium aluminate binder specially tailored for the demanding needs of the construction industry. It is ideal for applications where fast return to service or aesthetic features are important. The mineralogical phase composition of CARO WHITE is extremely well-controlled, resulting in a highly consistent binder.

For over 60 years, Almatris has been producing high-alumina calcium aluminate binders for specialty applications that demand consistent quality. With world-class global operations and a focus on innovation and application expertise, Almatris is a trusted partner for customers worldwide.

CARO WHITE

▶ High Reactivity

High early strength development and fast return to service.

▶ High Purity

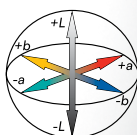

>99% calcium aluminate phases guarantee well-defined formulations and consistent properties.

▶ Superior Particle Size Control

Oversize-free for smooth, scratch-free surfaces.

▶ High Degree Of Whiteness

For use in combination with pigments to consistently achieve the color you need. (CIELAB values $L^* > 92$, $a^* > -0.5$, $b^* < 1.6$)

▶ Caro White Is Ideal In:

- Grout formulations
- Tile adhesives
- Self-leveling flooring (decorative)
- Technical mortars and other challenging construction applications

▶ Plastic Packaging

Provides superior stability for up to 24 months
